# WE CREATE AUDIOVISUAL CONTENT THAT WORKS.

We are experienced creators of online spots, TV ads, animations, and internal communication content. We design the concept, write the script, and our team of film makers bring it to life under the supervision of a skilled producer.

With growing interest in video, it is worth taking a conceptual approach and including video among your regular communication channels. We prepare content strategies suited to modern trends.

## VIDEOS

At Neocont, we are equipped to tackle any type of audiovisual request. We will take on large-budget TV campaigns as readily as targeted online projects or social media solutions with limited budgets.

## ANIMATIONS

2D animations, 3D animations, stop-motion, animatics, animated logos, explainers. That's just a small sample of the animation techniques at our disposal. We'll be happy to share our expertise and recommend the best solution for your needs.

## PRESENTATIONS

We don't see PowerPoint as a disaster but as an opportunity to help our clients present what they want. We usually look beyond the supposed boundaries of classical presentation tools and propose solutions that really work.

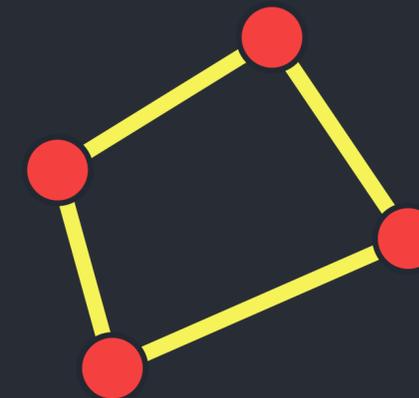

## ILLUSTRATIONS

Our skilled team can produce a broad range of diverse styles of bespoke illustrations that can embellish your website or be used to prepare animations, animatics, and storyboards.

## internal communication

Internal communication is a key instrument in company management and HR.

Neocont presents a platform that uses unique audiovisual materials to improve communication throughout all parts of a company.

## WE HAVE ALL PERMITS FOR DRONES OPERATION

Our team is trained at all levels for standard drone flying with licenses A1, A2 and A3. We fly with DJI Mavic 3 machines.
